

A Circus for Two

By VINCENT G. BERRY

Copyright, 1919, by the McClure Newspaper Syndicate.

Away at the south end of the small city of 15,000 population the huge tents of the Mammoth Three-Ring circus were pitched. A strike that had tied up transportation somewhere along the line was responsible for the Mammoth's sojourn there; for it was a big city circus. The circus would be there for a week, too. Surely this city of Windville was getting to be a wonderful place, the astonished natives thought.

But that was not all. In the glimmer and confusion that had arisen with the arrival of the Mammoth, the citizens of Windville had forgotten that the Puritan Brothers' one-ring circus was billed for a one-day stop in their midst that very week.

Even when the Puritan did arrive and pitched its one small tent on a northern lot at the outskirts of the city, the residents in the North end were the only ones to show any interest; a very weak interest it was, at that.

The Mammoth people were not going to get out of practice just because they were uninvited in a small town. With all their splendor they launched out for their grand street parade on the day that the Puritan thought it was the center of attraction. So engrossed and enraptured were the Windvillians with the wonderful parade that they failed to notice the chain of poorly painted wagons that met the big parade in the center of the city and had to turn down a side street to avoid a collision.

A few of the "neck-stretchers" on the side street took their eyes from the main attraction long enough to identify the rumbling wagons as gypsy

Seemed Fired With New Life.

caravans, and one or two did recognize it as the Puritan Brothers' "elegant" street parade.

The Puritan Brothers' circus was as dead as the brothers it was named after, and they had been dead for fifty years. It was hard for Mona Milson, star performer and owner of the Puritan, to make up her mind to this fact, but the clash at Windville decided it for her. Her venture was a failure. As a circus owner she was a good clown.

Of course, they wouldn't have an afternoon performance. Even the North end residents deserted the neighborhood in favor of the Mammoth as the matinee hour approached. Mona's disappointment knew no bounds. She had hoped against hope that this stop would net receipts sufficient to keep the creditors off until the show could get on a better footing, but now all would go. Right in the town where she had started out she would end her circus career a dismal ruin.

Never had the atmosphere of tent life been so gloomy as that afternoon. It was a glorious day outside and from over the fields Mona could catch a whiff of aromas that brought back pleasant memories—green grass, a running stream, wild flowers and a shady nook, were all just a few miles away. Why not go back to the scenes that had meant so much to her, the scenes she had never hoped to see again?

Joan, Mona's snow-white mount, the only attraction of the Puritan circus that remained in first-class form, seemed to know just the gulf Mona wanted her to travel along those country roads. The handsome mare, away from the sawdust and canvas for the first time in many months, seemed fired with new life. As the wind caught Mona's raven locks and pulled them down over her shoulders, ten years seemed to roll off her age. The color returned to her cheeks, blurring the traces of rouge into oblivion, the wrinkles left her forehead, her eyes sparkled once more.

The old scenes had not changed. There was the same path through the same opening in the fence, just where Joan came to a stop in the road and

allowed her mistress to alight. The fence was an ever-vigilant for the white horse, and it whirled with pleasure at the feeling of soft turf and green grass under its hoofs. Mona cried out with pleasure, too. This same old brook, the same old wild flower patch, the same old shady nook! There she stopped, and gathering up the reins of her mount rested her head on the side of the handsome Joan.

"You heard it all, little flowers and little brook," she whispered. "You were all here when we quarreled. It was just such a day as this, wasn't it? You remember how angry he became, how persistent I was. 'I am going to be a circus rider—I am going to be like my mother,' I told him while he fretted and fumed. He said what a horrible life it was; he said it would mean the end of everything between us—that if I loved him I would not lower myself to go into such work—that is just what he said, wasn't it? And I told him I didn't love him, I hated him if he talked like that, and I thought I did. But I didn't, little flowers, I didn't, little brook. I loved him, oh, so much!"

"And he loved you, oh, so much!" Mona became rigid. Had the brook answered in his voice? Were her ears deceiving her? Had her nerves got the best of her or could it be—could it be—was Roger there, standing right behind her? Roger was—but such a changed Roger, taller, more handsome by far, but with the same old smile, the same twinkle in his eye. She gazed at him for more than a minute, her heart throbbed violently. As in a dream his arms opened for her; she found her way into them and sobbed out her feelings on his shoulder.

"There, there, little Mona," he whispered just for her to hear, "don't feel so bad. Tell me all about it."

She gained control of her tears, but she did not leave the shelter of his arms. "It was just as you said," she told him, quietly. "My career has ended in failure—it was so bright at first, but after the big successes failure started in, and now we have ended up at Windville, where I started. The Puritan circus, that has stood for refined entertainment in the sawdust ring, is bankrupt and its owner, Mona Milson, is a pauper."

"But hasn't it all been worth while?" There was a new note of sympathy in Roger's voice.

Mona's spirit came back in force. "Worth while, yes," she declared, her eyes shining a new light. "Every success has been a paradise, every failure has just made a resolve for greater effort. It has been a great life. I can never leave it. I will fight on, on, until I have achieved what I started out to achieve—refined entertainment in a circus."

"I am not beaten. I won't be beaten, even though I know that my real happiness lies here, in this peaceful valley country with you and among those that love me. It hasn't been a fair fight. It has been a woman against the big trusts—a woman against organizations like the Mammoth."

"Join forces with the Mammoth; it is your chance to make good your ambitions!" Roger was excited, too.

"What chance have I?" she laughed. "The Puritan to them is a joke."

"The owner of the Puritan circus is the most wonderful woman in the world. He wants to marry her. I am the owner of the Mammoth. I started out to find you. I joined a circus in the hope that that would bring me nearer to you, and look what it has led to, after all these years! I know now why you left the narrow, bigoted country life—the fever of circus life is in my blood, too. Won't you join forces with the Mammoth, won't you marry the owner of the Mammoth? Mona, I need you, I want you so."

"I need you, I want you, too," Mona drew closer in his embrace. "Here where we quarreled, where we parted, we have come together again. The little flowers and the brook know all. If only we could take them to our circus for two!"

Persian Perfume.

Persia saw the earliest development of the perfume industry. The priests in Egypt, who were the sole depositors of science, knew the secret of aromatic substances and prepared them. Egyptian perfumes acquired great celebrity, especially those made in Alexandria. Reserved originally for religious rites, perfumes subsequently became of current use among the wealthy classes. During banquets they were diffused through the halls and were burned in profusion. The Israelites during their sojourn in Egypt adopted the use of aromatic substances primarily for religious purposes and afterward for personal usage. The Jews were fond of cosmetics, and even used them to paint the face. All those perfumes were extracted from essence of trees and various plants.

Great American Historian.

In 1800, on the 3d of October, George Bancroft, the historian, was born at Worcester, Mass. Bancroft began his "History of the United States" at the age of thirty. The first volume was published four years later, in 1834. For nearly fifty years he devoted himself to the work of writing a full history of the United States. The twelfth and last volume was published in 1882. During this period Bancroft found time for important political service. He was secretary of the navy and minister to Great Britain and to Germany. He died at Washington on January 17, 1891.

Nothing More.

"What of Congressman Fludd?" "Him? He's a barnacle on the ship of state."—Louisville Courier-Journal.

MARKED EPISODE IN INDUSTRY HUMPHREYS

Experiences of Years of Warfare Should Have Effect on Coal Mining in This Country.

The inventory of the nation's resources that the war made necessary brought to light many new facts about coal mining which will be of lasting value to the industry and to the public. As long as the war lasted these incidental lessons were lost sight of under the pressure of meeting the emergency created by the shortage of fuels, but with the return of peace the experience gained during the war is being gathered together in a series of reports on the industry, the first of which, "Coal in 1917," by C. E. Leaser, has been published by the United States geological survey, department of the interior.

The period from 1914 through 1917 and 1918 and into 1919 may be regarded as a distinct epoch in the coal industry, of which the year 1917 represented only one section, but a section which, if not the most remarkable for its achievements, was at once the most chaotic and the most momentous in the history of the industry.

In response to the unprecedented demand the bituminous mines produced 551,790,383 tons, or nearly 10 per cent more than the output of the year before. The anthracite output was 89,611,811 net tons, an increase over 1916 of 18.7 per cent. The total output of both hard and soft coal was thus over 650,000,000 tons.

This record output was accomplished by a labor force of 603,143 men in the bituminous and 154,174 in the anthracite mines. In spite of the draft the number of workers in the bituminous industry was greater in 1917 than in 1916.

UNCLE SAM'S GAME RESERVE

Island of Afognak, on South Coast of Alaska, Peculiarly Adapted for the Purpose.

One of the most picturesquely interesting parts of our national domain is a large island off the south coast of Alaska. It is called Afognak and is about 85 miles long by 40 in width, with a very irregular shore line and deeply indented by bays.

It is the property of the government, and in 1892 was set aside by President Harrison as a game and fish reserve. The important purpose that it serves is that of a preserve for salmon, all the finest varieties of which run up its stream in great numbers at the breeding season to spawn.

Afognak is a mountainous island, of volcanic origin, its loftiest peak rising to an elevation of 1,800 feet. In the interior are a number of large lakes, which are the breeding grounds of the salmon. One of these, Letnik lake, is seven miles long, and on its shore is located a big government fish hatchery.

In the days of long ago, before the United States bought Alaska, the salmon fishery of Afognak was operated by the Russian-American company, which established on the island a colony of its superannuated and pensioned employees. These were Aleuts, whose descendants today compose the native population, somewhat more than 400, though their blood is much mixed.

Soldiers and Bananas Growing.

The New South Wales government has not been long in providing its returning soldiers with work. One of the enterprises undertaken with this object is the cultivation of bananas on a large scale. There is no fruit crop that yields such a quick return as the banana and in the present flourishing state of the market no better undertaking could have been selected, given the right men. It is not work for the lazy. But among the demobilized troops are plenty of men who are young, tough and teachable. Four hundred acres have been taken as a beginning and each settler has 12 months' probation before a black is entrusted to him. The sum of £225 is advanced to each for implements, stock, and house-building material. The soldiers have already started and enjoy their rough life in the hills. The experienced planter, Mr. C. Rose, who is in charge, sees nothing but success ahead in reward for their efforts.

Prickly Pear Proving Pest.

Australia is suffering from a prickly pear pest, which takes advantage of the rivers as a means of spreading. Shoots break off from the parent plant growing along a stream and the part is carried downstream to found a new colony. Thousands of acres are being ruined yearly owing to the ravages of this plant, and no means have been discovered of stopping its march. Rolling, spraying and poisons have proved ineffectual, and it is hoped that some scientist may find some commercial use for the plant.

Indian Women Progressing.

Oklahoma Indian girls are as much interested in the canning campaign as their paleface sisters. In Beckham county, Okla., they attend all the meetings held by the home demonstration agent, and this year made an excellent booth exhibit of the fruit and vegetables they had canned and dried. One Indian woman also exhibited 100 chickens of her own raising.—Exchange.

London's Housing Problem.

The London housing board has inspected 2,000 houses that may be converted into flats. Of these 1,000 have been approved and work is to be commenced immediately. Work has also been begun on 8,000 houses.

160 Hens—1500 Eggs

Mrs. H. P. Patton, Waverly, Mo., writes: "I fed 2 boxes of 'More Eggs' to my hens and broke the egg record. I got 1500 eggs from 160 hens in exactly 31 days. You can do as well. Any poultry raiser can easily double his profits by doubling the egg production of his hens. A scientific tonic has been discovered that vitalizes the flock and makes hens work all the time. The tonic is called 'More Eggs.' Give your hens a few cents worth of 'More Eggs' and you will be amazed and delighted with results. 'More Eggs' will double this year's production of eggs, so if you wish to try this great profit maker, write to J. H. Reeder, poultry expert, 1638 Reeder Bldg., Kansas City, Mo., for a 31-day package of 'More Eggs' tonic. Or send \$2.35 to-day and get three regular 31-day packages on special full discount for a season's supply. A million dollar bank guarantee if you are not absolutely satisfied, your money will be returned on request and the 'More Eggs' tonic nothing. You take no risk. Write to-day. Put a dollar bill to your letter or send \$2.35 on special discount for 3 packages. Or ask Mr. Reeder to send you free his poultry book that tells the experience of a man who has made a fortune out of poultry.—Adv. &

NOTICE OF LETTING OF DRAIN CONTRACT.

Notice is hereby given, That L. Alonso Griffin, County Drain Commissioner of the County of Shiawassee, State of Michigan, will, on the 29th day of January, A. D. 1920, at the residence of Ezra Long, in the Township of Caledonia, in said County of Shiawassee, at nine o'clock in the forenoon of that day, proceed to receive bids for the construction of a certain drain known and designated as "Wheeler Drain," located and established in the Township of Caledonia, in said County of Shiawassee, and described as follows, to-wit:

Your petitioners show that the said drain needs deepening, widening, straightening, etc. and that the said Wheeler Drain, which is a certain drain known and designated as "Wheeler Drain," located and established in the Township of Caledonia, in said County of Shiawassee, and described as follows, to-wit:

Corunna, Mich., Oct. 27th, 1919.

We, the following free holders of the township of Caledonia, hereby petition Alonso Griffin, County Drain Commissioner of the County of Shiawassee, State of Michigan, to let to be laid in the Wheeler Drain instead of an open drain as petitioned for. Size of site to be 10 inch or less, to be determined by the Commissioner. F. M. Sanders, Mrs. Edna Sanders, James E. Sullivan, A. T. Derr, Edwin E. Derr, O. A. Brown, Walter Brown, C. M. Bilhimer, Inda Bilhimer, Frank Kolarik, Ezra Long.

The minutes of survey and table of cuttings are on file in the office of the County Drain Commissioner, and are open for inspection by all parties interested, at all times after the giving of the notice, until the date therein set, and shall be in the possession of said Drain Commissioner and open to inspection at the time and place of letting.

Bids will be received for constructing and laying 10 rods tile drain.

Bids will be received for furnishing 300 rods 18 inch, 24 inch, and 42 inch tile. Said tile to be No. 1 hard glazed tile.

Bids will be received for drawing 670 rods tile per specifications.

Bids will be received for constructing 3 cement bridges and one bar.

Said job will be let in one section in accordance with the diagram now on file with the other papers pertaining to said Drain in the office of the County Drain Commissioner of the County of Shiawassee, to which reference may be made by all parties interested, and which will be made and received accordingly. Contracts will be made with the lowest responsible bidder, giving adequate security for the performance of the work, in a sum then and there to be fixed by me, reserving the right to reject any and all bids. The date for the completion of such contract, and the terms of payment of the same, shall and will be announced at the time and place of letting.

Notice is further hereby given, That at the time and place of said letting, or at such other time and place thereafter to which I, the County Drain Commissioner aforesaid, may adjourn the same, the assessments for benefits and the lands comprised within the "Wheeler Drain Special Assessment District," and the assessments thereon will be announced by me and will be subject to review for one day from nine o'clock in the forenoon until one o'clock in the afternoon.

The following is a description of the several tracts or parcels of land constituting the special assessment district of said Drain, viz: Township of Caledonia at large. Sec. 10, 20, 30, 40, 50, 60, 70, 80, 90, 100, 110, 120, 130, 140, 150, 160, 170, 180, 190, 200, 210, 220, 230, 240, 250, 260, 270, 280, 290, 300, 310, 320, 330, 340, 350, 360, 370, 380, 390, 400, 410, 420, 430, 440, 450, 460, 470, 480, 490, 500, 510, 520, 530, 540, 550, 560, 570, 580, 590, 600, 610, 620, 630, 640, 650, 660, 670, 680, 690, 700, 710, 720, 730, 740, 750, 760, 770, 780, 790, 800, 810, 820, 830, 840, 850, 860, 870, 880, 890, 900, 910, 920, 930, 940, 950, 960, 970, 980, 990, 1000.

Now, therefore, all unknown or non-resident persons, owners and persons interested in the above described lands, and you, Charles Tappan, supervisor of Robert E. Fields, highway commissioner, Harold Long, Geo. W. McCallister, Louis Long, Fred Sanders, Anton Newell, Sterling Newell, John Newell, Edgar Brewster, Stephen Kolarik, Edward Wagner, Fred Brown, A. T. Derr, John Newell, and wife, Frank Kolarik, C. M. Bilhimer, are hereby notified that at the time and place aforesaid, or at such other time and place thereafter to which I, the County Drain Commissioner aforesaid, may adjourn, I shall proceed to receive bids for the construction of said Wheeler Drain, in the manner hereinbefore stated; and also that at such time of letting from nine o'clock in the forenoon to one o'clock in the afternoon, the assessment for benefits, and the lands comprised within the "Wheeler Drain Special Assessment District" will be subject to review, and each of you, owners and persons interested in the above lands, are hereby cited to appear at the time and place of said letting, as aforesaid, and be heard with respect to such special assessments, and your interests in relation thereto, if you so desire.

ALONZO GRIFFIN, County Drain Commissioner, of the County of Shiawassee.

Dated this 24th day of December, A. D. 1919.
